

OXYGEN and the environment

Oxygen is produced by one of Europe's leading manufacturers of uncoated recycled papers, with an outstanding reputation for making products which meet the latest environmental standards.

The manufacturing mill is in France. It is ISO 9001, ISO 14001 and FSC certified.

Oxygen is made using 100% recycled pulp a large percentage of which is de-inked. Up to 30% of the mills requirements are obtained from UK waste, thus reducing landfill.

Oxygen is FSC certified, and carries the NAPM recycled mark and the EU Ecolabel.
