

SATIMAT GREEN

SATIMAT GREEN is manufactured by one of Europe's leading makers of recycled coated papers, who have a reputation for making products which meet the latest environmental standards.

The product contains minimum of 75% selected post consumer recycled fibre and 25% FSC virgin fibre.

The recycled fibre comes from Arjowiggins Greenfield pulp mill. One of Europe's only recycled pulp mills to obtain FSC certification. Greenfield use mainly office waste and take approx 25% of their waste paper from the UK market, thus reducing our landfill.

Greenfield's unique 3 stage process enables them to manufacture the highest and whitest recycled pulp available.

The mills are ISO 9001, ISO 14001 and FSC certified.

SATIMAT GREEN is a 75% recycled, FSC certified product and meets the latest "quick wins" specification.

A full copy of the mill's environmental statement is available on request.

Satimat Green is manufactured by
