

GardaGloss

GardaSatin

Garda & the Environment

Garda Gloss and Satin are manufactured by Lecta, a mill firmly committed to sustainability. They have obtained the strictest environmental management and quality certifications, thus minimising their impact on the environment. Their manufacturing sites hold ISO 9001 quality certification, ISO 14001 and EMAS environmental management certifications and ISO 50001 energy management certification. Furthermore, they are able to guarantee the sustainable origin of the wood used to manufacture Garda, in strict compliance with EU Timber Regulations and FSC® chain of custody standards thereby offering maximum credibility and transparency in wood sourcing operations.

For a copy of the mill's full environmental report, please contact your local sales office.
