Environmental Policy Statement

We at Elliott Baxter recognise that in pursuing our business objectives we have a responsibility to protect and nurture the environment. By exercising proper control over our activities we will promote the use of sustainable resources and discourage wasteful or damaging practices.

The timber used in the manufacture of the pulp which creates the paper we stock comes from sustainable and well-managed forests. The timber is treated as a crop with replanting programmes exceeding the quantity of felled trees.

We successfully achieved accreditation to FSC and PEFC in May 2006, and ISO 14001 in November 2008, and are committed to the values in all these standards.

We will so far as is reasonably practicable:

- Comply with all relevant environmental laws and regulations both locally and nationally.
- Ensure that sub-contractors and suppliers apply equivalent environmental standards.
- Make environmental information about the products that we stock available to our customers.
- Recycle office waste and defective stocks.
- Purchase lower emission commercial vehicles and company cars where appropriate.
- Ensure that employees, suppliers and customers have access to this policy statement.

As the UK's leading independent paper merchant, our aim is to combine service excellence with an environmentally friendly approach, setting the standards for best practice in our industry. Our commitment to continually minimise our impact to the environment demonstrates how seriously we take this issue. We will set objectives and targets to help us achieve this commitment. The success of this policy, which we will review regularly, relies on everyone being actively involved. We all have a valuable role to play in showing that good environmental policy at work is good business.

A handwritten signature in black ink that reads 'Matt Elliott'.
