Special Request

Fluorescent whitening agents (FWA)

Due to whiteness enhance, fluorescent whitening agents (FWA) are added into the bleached chemical pulp, into the surface sizing and the pigment coatings of some products. FWA do not migrate to dry or fatty foodstuffs and do not migrate to wet foodstuffs, protected by a plastic coating, according to EN 648.

CEPI Industry Guideline

Our products comply with the CEPI Industry Guideline for the compliance of Paper and Board and Articles for Food Contact including the substances as defined in Annex 1 of this Guide

This certificate is valid until 2017-10-22 or until either the customer requirement or the legislation has been significantly changed.

This declaration is prepared and assured by Richard Scales, Product Manager at Iggesund Paperboard (Workington) Ltd
