

Product / brand: Oxygen Offset

Paper Mill: Bessé-sur-Braye / Wizernes

Country of origin: France

Website: www.ebbpaper.co.uk

OXYGEN OFFSET PAPER & BOARD 100% RECYCLED

Product Data

- Uncoated paper and board
- Bright white, smooth, even surface
- Manufactured using 100% de-inked pulp recycled fibre
- Exclusive to EBB
- Suitable for multi-colour printing
- It carries both the NAPM 100% recycled mark and is FSC certified
- Produced at a mill which is ISO 9001, ISO14001 and FSC certified
- Oxygen is available in the following weights: 80, 90, 100, 120, 140, 160, 200, 250, 300 and 350 gsm

Certified Management Systems & Product Certifications

	Quality Management Standard		FSC® Recycled certified (No. FSC-C021878)		HP Indigo certified		PCF Process Chlorine Free
	Environmental Management Standard		EU Ecolabel Certification (No. FR/011/003)		Age-resistant standard suitable for archives (LDK class 24-85)		Toy safety
	Health and Safety Management Standard		National Association of Paper Merchants		Heavy metal absence		Heavy metal absence

Fibre sourcing and recycling

100% post-consumer fibres*, FSC® Recycled certified and PCF(Process Chlorine Free).

* Coming from Greenfield Mill, part of the Arjowiggins Group, (less than 260 km from Wizernes mill and less than 280 km from Bessé mill, where the paper is manufactured).

Chemicals

No substances classified as carcinogenic, mutagenic or reprotoxic (CMR) are used as raw materials.

Arjowiggins Graphic complies with new REACH (Registration, Evaluation, Authorisation and Restriction of Chemical Substances) European Community Regulation, created to improve protection of human health and the environment from the risks that can be posed by chemicals as well as the promotion of alternative test methods, free circulation of substances and enhancing competitiveness and innovation.

For more information go to www.echa.europa.eu

Packaging

We work with our suppliers to reduce the amount of packaging used (ream wrapper, shrink film, plastic banding). Today a minimum of 93% of our packaging is recyclable.

Transport

The Arjowiggins Graphic transport policy is eco-responsible, optimising logistics and taking environmental issues into account: i.e. minimizing distances between raw material, mills and customers in Europe, encouraging eco-driving to decrease fuel consumption, shifting volumes to rail and sea transport wherever possible.

Environmental Parameters

Note: These figures include both pulp and paper production.

Arjowiggins Graphic is fully committed to environmental responsibility during the development and production of its pulp and paper *

* Figures based on 2012 measurements

** Fossil energy

Bessé sur Bray / Wizernes		
Water	COD	2.8 Kg/t
	AOX	0.000 Kg/t
	N	0.166 Kg/t
	P	0.009 Kg/t
Air	SO ₂	0.003 Kg/t
	NO _x	0.377 Kg/t
	CO ₂ **	340 Kg/t
Purchased electricity		1361 KWh/t
Solid waste landfill		26 Kg/t

Carbon Footprint

- Carbon footprint of Bessé sur Bray and Wizerne mills : **602 kg CO₂/t** of paper (Bilan Carbone® methodology)

What is a carbon footprint in relation to Arjowiggins Graphic?

Carbon footprint is a measure of the impact human activities have on the environment in terms of the amount of greenhouse gases produced, (measured in units of carbon dioxide equivalent).

Why is measuring your carbon footprint important?

Arjowiggins Graphic calculates its carbon footprint for two main reasons: to assist customers in estimating their own carbon footprint and to monitor the greenhouse gas emissions as a result of our production processes.

How is the Arjowiggins Graphic carbon footprint calculated?

Carbon footprint calculations are not regulated on a global or national basis and this is why Arjowiggins Graphic have selected independent and long established companies to undertake its calculations: Labelia Conseil evaluates Carbon footprint data in accordance with the Bilan Carbone® methodology.

What is the Bilan Carbone® method of carbon footprint calculation?

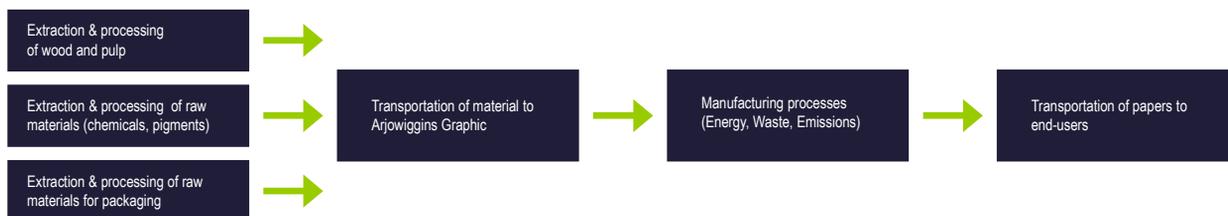

This is a well agreed methodology, based on the international Greenhouse Gaz Protocol, for a consistent method of measuring, reporting and communicating the greenhouse gas emissions (carbon footprint) of goods or services across their lifecycle developed.

Bilan Carbone® has been recognised by the British Standards Institute (BSI).

The coverage of carbon footprint calculations:

Our boundaries considered for analysis include the whole production process i.e. from the raw materials to the delivery of finished products. Always check the carbon footprint coverage before comparison to be confident that all the relevant and potential sources of CO₂ have been covered.

Currently Arjowiggins Graphic has chosen a plan of carbon footprint reduction, but not a plan of carbon offsetting.
